

KeyesCalc™

Version 1.0

iSeries Spooled File to Spreadsheet Utility

Introduction

KeyesCalc can be used to convert spooled files into CSV spreadsheet format. The resulting CSV files can be used for any desired purpose, such as e-mailing, archiving, or posting on a website.

Spooled files must be standard *SCS printer files. We provide a mapping tool so that you can map each spooled file field to the desired spreadsheet columns.

For example: You can call our API to convert spooled files into CSV documents and have them placed into your IFS (Integrated File System). This would make it available to everyone with access to the IFS directory.

KeyesCalc includes an automatic output queue processing program. It will monitor an output queue called KCOUQTQ. When any spooled file appears in this output queue, in a "RDY" status, it will be automatically converted to a CSV file and placed in your IFS.

Simple Installation

The software can be easily downloaded from our website and installed on any iSeries or System i computer. An install procedure will automatically create all of the necessary subsystem objects in the KeyesCalc library.

Application Program Interface

We have included an API in the system so that you can automatically convert spooled files directly from your applications. The API is a command that you can easily process in any CL program.

Output Queue Monitoring

We have included an output queue that is monitored so that you can route spooled files for automatic conversion. Your spooled files will be immediately converted with automatic indexing to the locations that you specify.

KeyesMail™

KeyesCalc can be integrated with KeyesMail to allow you to email your spooled files converted into spreadsheets. New options will become available within KeyesMail menu and API's when KeyesCalc library is installed.

Requirements

Hardware

Any model iSeries, IBM i, or AS/400 Computer

Software

OS/400 Version 7 Rel 1 or higher

Support

Hot-line technical support

Computer Keyes provides hot-line and email technical support to assist you in the use of KeyesCalc software.

Annual Maintenance

The first year of maintenance is free. Thereafter, an annual maintenance fee of 20% of the current price will keep your system current and bug free.

Pricing (All Models) – As of 1/01/23

\$2750.00 Multi-copy discounts are available.

Guarantee

No Bug Guarantee

While on maintenance, if KeyesCalc does not perform a function as intended, Computer Keyes will send you a correction, usually within one day.
